

eSTART Notification – Sandbox Application Availability

eSTART Upgrade – Sandbox Application Availability Notification

We are pleased to announce that the upgraded **eSTART Sandbox application is available for login**. This is provided **ONLY** for Agency & Leave Administrators and Timekeepers.

URL: stateofalabama-uat-ssn.npr.mykronos.com/wfd/home

Login Information

- SSO (Single Sign-On) Users: Use your standard network credentials to access eSTART.
- Two-Factor Authentication (2FA): Required for all application users with manager licenses.

Once you have successfully logged into the system, you may begin testing any of the manual processes that will be required in the production eSTART application at go-live. Please note that any entries made in the sandbox environment will **not** be transferred to production. This environment is provided solely for testing and familiarization with the new system.

To assist with these post-upgrade manual activities, job aids have been provided for the following processes:

- **Schedule Patterns**
- **Delegation Groups**
- **Future Time Off Requests**
- **Personal Hyperfinds**
- **FMLA Cases**

Please review the applicable job aids and practice updates to ensure your eSTART environment will be configured appropriately.

If you experience any issues accessing the system or need assistance completing these processes, please contact the **Help Desk** for support.

Thank you for your partnership as we complete the eSTART upgrade and transition to the enhanced platform.
